DETAILED ACTION

1. The examiner of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 1647 and examiner J. Seharaseyon.
2. The request filed on 5/3/01 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/366133 is acceptable and a CPA has been established. An action on the CPA follows.
3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, drawn to a method of treating excess weight, classified in class 514, subclass 2.
 - II. Claims 5-10, drawn to DNA encoding the Ob protein and vectors, classified in class 536, subclass 23.5.
 - III. Claims 11 and 12, drawn to a method of refolding a partially purified Ob protein, classified in class 530, subclass 350.

The inventions are distinct, each from the other, for the following reasons:

Inventions II and III are related as product made process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case DNA of Group II can be used other than to make Ob protein such as its use in therapy or diagnostically. Furthermore, the

protein of Group III can be prepared by materially different process, such as by chemical synthesis.

Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the method of treating excess weight is unrelated to method of refolding a protein.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

If applicant elects Group I, he/she must also elect a species set forth in claim 1 from each of group of the nucleotides. Specifically, applicant is required to choose from SEQ ID No: 1 and 2. The claims of this group will be examined to the extent of the elected species.

If applicant elects Group II, he/she must also elect a species set forth in claims 5 and 8 from each of group of the nucleotides. Specifically, applicant is required to choose from SEQ ID No: 1 and 4. The claims of this group will be examined to the extent of the elected species.

If applicant elects Group III, he/she must also elect a species set forth in claim 11 from each of group of the polypeptides. Specifically, applicant is required to choose from SEQ ID No: 3 and 6. The claims of this group will be examined to the extent of the elected species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Currently, 1, 5, 8 and 11 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

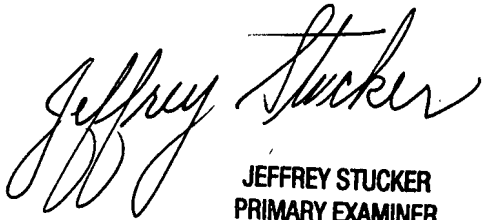

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
